

## NOTICE OF LIABILITY

non violent

Being born as a woman on this planet I have inalienable birthrights. These include freedom of speech, freedom of travel, bodily integrity and property rights. I refer to the RULE OF LAW which is the natural law and is above any man made law. The rule of law is to do no harm, loss or injury (neither to another being if it is not self defense nor to oneself) and to protect the vulnerable.

My simple presence as a woman - with the absence of knives, guns, weapons etc - is no threat. I'm a living, breathing being who is aware that my well being is my responsibility, just as every adult's well being is their very responsibility. It's our own choices what we do/not do - how I live my life, where I travel to, who I work for, what people I surround myself with, what food I eat/products I consume, what (risks) I expose myself to.

As men and women we are meant to be and live with other beings such as humans, animals, plants and nature as a whole on an eye to eye level. Dependencies are unhealthy. We are meant to organize ourselves in decentralized, distributed, open source, collaborative ways where informed consent is the highest rule. For further information I refer to the Nuremberg Code\*.

In case of Covid-19/Corona and the resulting "pandemic" with survival rates of > 99% there is neither logic nor evidence or science that

- masks work (thinking a mask would protect one from what is referred to as a "virus" is like thinking a mesh wire fence would protect one from mosquitoes)
- "tests" work (the inventor of PCR Kary Mullis emphasized over and over that PCR is not a diagnostic tool, it is a technique to REPLICATE genetic material)
- "vaccines"/experimental gene therapies work (it is unprocessed food, sunshine, movement, loving community that enables us to be healthy - not aluminum, mercury, other neurotoxins, aborted fetal tissue, monkey kidney cells, mRNA altering particles and/or microchips)
- lockdowns work ("quarantine" by definition is to isolate sick people hence what is called lockdown is house arrest where a large number of people are suffering from Stockholm Syndrome, Munchausen Syndrome, Munchausen Syndrome by Proxy, Cognitive Dissonance and Denial)

The SARS-CoV-2 "virus" just like many other "viruses" have not been isolated and therefore cannot be declared to be the cause of an illness. We live in symbiosis with trillions of microorganisms such as bacteria, "viruses" (or exosomes) and fungi. As a biologist but also simply having natural common sense I see microorganisms as firemen. Whenever there is a fire there is firemen but blaming the firemen to be the cause of the fire is quite frankly a very immature approach. Germ theory has not been proven and is the underlying cause of the psyop we are experiencing. How would we have been able to survive all these thousands of years if there was one single "virus" out there - being found in highly developed times - having the agenda to extinguish mankind?

I don't consent to mind control. I don't consent to being forced measures that harm my body.

I choose self responsibility of my life.

I choose adult consciousness.

If my birthrights are violated I will prosecute the predator on a private and personal level, not as the police officer, medical professional or other persona they act under.

I will ask the representatives of a given institution if they are acting under oath 3 times. Police officers swear the Oath of Honor before they can act as such just like medical doctors swear the Hippocratic Oath to protect humans, uphold our rights and do no harm.

If they don't answer with yes it is criminal offense *fraud/misrepresentation* which is 20 years in prison.  
To be threatened is criminal offense *unlawful detention/threatening behavior* which is 5 years in prison.  
To be touched without consent is criminal offense *assault/battery/coercion* which is 5 years in prison.

My Body, My Choice.

IN LOVE AND TRUTH,

Angelika

I am a woman, not a person (company/commodity/Mr. Mrs. Ms.) that was made through a birth certificate and social security number
